

# P SERIES ACCESSORIES

[inflatablesolutions.com](http://inflatablesolutions.com)

Used for special operations, Wing offers several complementary, customizable components for the P Series craft to ensure mission success.

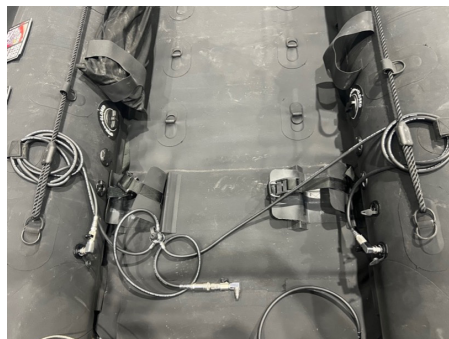

## FUEL BLADDERS:

Wing Inflatables offers the only 6, 9 and 18 GL bladders that have a waiver from the USAF for air transportation and are UN1203 certified. The bladders fit in the bow of the P Series craft, are Radio Frequency (RF) welded, and built to the highest standards.

## AUTO INFLATE:

Custom auto-inflate systems are designed around specific user needs and utilize CO2, SCUBA, SCBA bottles, and DIN and Yoke adapters as needed. The systems can inflate the craft while rolled or with different floor options, including the drop stitch air deck.

## CACHE CAPABILITY:

The Wing-developed cache system integrates into the inflation system allowing a bottle to cache a craft within four minutes. A second bottle can fully inflate it.

Used for special operations, Wing offers several complementary, customizable components for the P Series craft to ensure mission success.

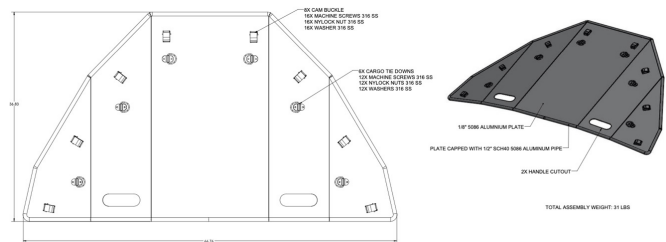

## ENVIRONMENTAL COVER:

An environmental cover keeps the user out of the weather when idle or pier side.

## RIGID BOW COVER ASSEMBLY:

The rigid bow cover functions as a bow platform and allows for underboard storage. A fuel bladder can easily fit under it.

## COMPASS BOARD AND SECURING NET:

The Compass Board and Securing Net are practical for holding navigation accessories and securing equipment when underway or during drop deployments.
